EDUCATION

Moonwalk National High School <i>Junior High School (STE) to Senior High School (STEM)</i>	Moonwalk, Parañaque 2015 – 2021
National Univeristy - Manila <i>Bachelor of Science in Computer Science with Specialization in Machine Learning</i>	Sampaloc, Manila 2022 – Present

EXPERIENCE

Undergraduate Research Assistant <i>National University - Manila</i> - Developed a Geospatial Temporal Risk Analysis Model used for predicting road incident scores in MMDA monitored roads. - Research paper accepted in the ISCAIE2025 Conference	2024 – Present Sampaloc, Manila
Internal Vice President <i>NU Axios: DOST Scholars' Association</i> - Led strategic initiatives to enhance member engagement and organizational growth - Streamlined operations by developing and implementing internal policies and procedures - Coordinated major events, including workshops and seminars, attracting over 100 participants	2024 – Present Sampaloc, Manila
Vice Marketing Officer <i>AWS Learning Club - Legarda</i> - Leveraged social media and digital marketing tools to promote club activities and engage potential members - Created promotional materials and successfully increased event attendance and participant satisfaction - Collaborated with other organizations to co-host events, expanding the club's reach	2024 – Present Sampaloc, Manila
DOST Scholar <i>National University - Manila</i> - Maintained a high academic standing, consistently achieving top grades in a rigorous and fast-paced curriculum - Recognized for academic achievements with scholarships and awards, demonstrating commitment to excellence - Mentored junior scholars and organized study groups to foster collaborative learning	2022 – Present Sampaloc, Manila
Competitive Programmer <i>National University - Manila</i> - Secured 3rd place in the "Beyond the Grid: Meralco Idol Hackathon 2024" with "GridGuard," an AI-driven power grid monitoring system - Participated in numerous hackathons, delivering innovative solutions and earning recognition	2022 – Present Sampaloc, Manila

PROJECTS

- Created a Discord bot using a custom web scraping API to fetch sneaker details from the GOAT website
- Built a predictive model using the 2019 StockX dataset to forecast sneaker prices
- Developed an Android app with basic, scientific, and graphing calculator modes that is similar to Desmos
- Developed a signature forgery detection system using YOLOv8, YOLOv5, and a custom CNN
- Developed a manufacturing management system for modular phone production using MERN stack and Google Maps API to provide real-time tracking of inventory, production, and shipments to optimize logistics
- Developed a Geospatial Temporal Risk Analysis Model that can be used for predicting road incident scores to avoid traffic or related incidents
- Created a terminal-based chatbot using LangChain and OllamaLLM for interactive conversations
- Created GridGuard that's an AI-driven power grid monitoring system

TECHNICAL SKILLS

Languages: Java, Python, SQL (MySQL), JavaScript, HTML/CSS, Kotlin
Frameworks: React, Next.js, Flask, Node.js, Express.js, JUnit, Material-UI, FastAPI, Django, Streamlit
Developer Tools: Git, Docker, TravisCI, Google Cloud Platform, VS Code, Android Studio, PyCharm, MongoDB (NoSQL)
Libraries: pandas, NumPy, Matplotlib, LangChain, OllamaLLM, PyTorch, YOLO
